

FULL SAFETY PATTERN GAUGES

For use with gases and steam above 25 bar. A solid baffle wall, blow-out back and safety glass or perspex windows are used to direct escaping pressure out of the back of the gauge to prevent operator injury in the event of a gauge failure. Surface mounted gauges should use mounting extensions no shorter than 20mm to allow for correct operation of the safety design.

These instruments are built to special order to customer specification. Please contact us for further information or quotation.
