

## OXYGEN USE GAUGES

Oxygen under pressure when in contact with oil or grease can lead to a high risk of explosion. It is imperative that extreme care is always taken in the manufacture, testing and installation of oxygen gauges to avoid any oil contamination. Oxygen gauges must be of the safety pattern type and have Oxygen and Use No Oil symbol printed clearly on the dial.

These instruments are built to special order to customer specification. Please contact us for further information or quotation.
